Luis Toubes

Lead Frontend Engineer

+34 618 605 173 | toubes@gmail.com | xcafebabe | toubes

Professional Summary

Frontend-focused Lead Software Engineer with 20+ years of experience, including 6+ years building **React**, **Next.js** and **TypeScript** applications in a large, shared codebase used across multiple projects. Focused on reusable component libraries (**Storybook**), web performance (**Core Web Vitals**), automated testing (**Cypress**, **Playwright**, **Percy**) and **CI/CD**. Experienced in leading frontend teams, running code reviews and mentoring engineers, and in shipping safely through feature flags and A/B testing (**LaunchDarkly**), backed by real-user analytics (**FullStory**, **GA4**).

Experience

LEAD SOFTWARE ENGINEER | Gartner

April 2024 – December 2025 | Barcelona, Spain

- Led the frontend team's growth through code reviews and engineering practices, raising code quality and consistency.
- Shipped features safely with Product Owners and designers using **feature flags** and A/B tests (**LaunchDarkly**).
- Built real-user analytics dashboards with **FullStory** and **GA4** to drive data-informed decisions.
- Maintained end-to-end and visual regression test suites with **Cypress**, **Playwright** and **Percy**.

SENIOR SOFTWARE ENGINEER | Gartner

September 2019 – March 2024 | Barcelona, Spain

- Built full-stack features with **React**, **Next.js**, **TypeScript**, **Node.js** and **Elasticsearch**.
- Improved web performance by integrating **Google Web Vitals** monitoring and optimizing application load times.
- Built and maintained a shared component library in **Storybook**, used across multiple projects.
- Implemented **CI/CD** and comprehensive automated test coverage with **Cypress**, **Playwright** and **Percy**, reducing development cycles.

SENIOR SOFTWARE ENGINEER | InnoIT Consulting

January 2019 – August 2019 | Barcelona, Spain

- Built an isomorphic marketplace application for the new residential construction sector with **React**, **Node.js**, **Docker** and **ElasticSearch**, taking a frontend-first approach.

SENIOR SOFTWARE ENGINEER | Traffic Network Solutions

January 2018 – December 2018 | Barcelona, Spain

- Containerized a monolithic web system with **Docker**, built a **Node.js** / **MQTT** backend platform and introduced a **CI/CD** workflow with Gitlab.

EARLIER EXPERIENCE | 2002 – 2017

- **Lead Software Engineer, Inopus GmbH** (Munich, 2014 – 2017): led an agile team of 5 developers, coaching and mentoring the team and setting internal engineering standards.
- Frontend, Java and Drupal engineering roles, including atSistemas and Sun Microsystems.

Skills

LANGUAGES

TypeScript • JavaScript • HTML5 • CSS3

Familiar:
Shell • Java • Python

FRONTEND

React • Next.js • Storybook • Zustand

TESTING

Cypress • Playwright • Percy

BACKEND/TOOLS

Node.js • GitHub Actions • Docker • AWS • Kubernetes • LaunchDarkly

Education

UCAB

Master's in Computer Science

1998 - 2003 | Caracas, Venezuela

Languages

Spanish (native) • English (full professional) • German (limited working)
